

LEBENS LAUF

 Geburtsdaten 06.09.1999 in Indien

MAHESH CHANDA

DevOps & Site Reliability Engineer

 Address Frisco, TX, USA (Open to Relocation / Eligible for EU Blue Card)
 Mobile +1 (817) 319-0147 (Available via WhatsApp)
 E-Mail chandamaheshh@gmail.com
 LinkedIn www.linkedin.com/in/mahesh-chandaa69
Work permit: Eligible for the EU Blue Card (Skilled worker)

PROFESSIONAL EXPERIENCE

seit 09/2025

Salesforce (USA) (contract worker)

AWS DevOps Engineer

Technologies: AWS (EKS, VPC, EC2, ELK, S3, EBS, IAM, ELB), Terraform, Ansible, Jenkins, Argo CD, Docker, Kubernetes, Splunk, Dynatrace.

- Design, provisioning, and management of resilient AWS cloud infrastructure topologies for high-availability multi-region production workloads.
- Automation of cloud infrastructure and immutable configuration environments using Terraform and Ansible to significantly reduce toil and minimize manual interventions by 70%.
- Development of highly reliable CI/CD pipelines with TeamCity, Jenkins, and Argo CD for automated version control, secure rollbacks, and programmatic quality gates.
- Containerization of application microservices (Docker) and management of large-scale orchestrations on AWS EKS clusters using Helm charts and GitOps deployments.
- Monitoring of system telemetry via AWS CloudWatch, Dynatrace, and ELK stack dashboards to reduce Mean Time to Resolution (MTTR) as part of the on-call rotation.
- Hardening of platform security through granular AWS IAM roles, VPC peering policies, network security groups, and AWS Secrets Manager.

01/2024 – 09/2025

TIAA (USA) (contract worker)

Site Reliability Engineer (SRE)

Technologies: AWS, Terraform, Ansible, GitHub Actions, Docker, Kubernetes, Prometheus, Grafana, Splunk, ELK Stack, Jira, LDAP.

- Definition and monitoring of Service Level Indicators (SLIs), Service Level Objectives (SLOs), and SLAs, as well as strategic management of error budgets to ensure 99.99% availability.
- Leading incident management processes for P1/P2 incidents and authoring structured "blameless post-mortems" for sustainable error prevention.
- Architecting zero-downtime deployment pipelines to orchestrate agile microservices releases across multi-stage sandbox and production environments.
- Establishing reusable platform engineering frameworks (self-service infrastructure) for massive toil reduction and decreasing operational dependencies.
- Creating custom Django REST framework scripts for AWS EC2 nodes to automate testing frameworks and increase verification throughput.
- Orchestrating critical core services with Docker and managing service discovery and auto-scaling in multi-tenant AWS EKS clusters.

01/2023 – 12/2023	Southern Arkansas University (USA) Student Research Assistant (Wissenschaftliche Hilfskraft) • Tutored students in relational database fundamentals (ER modeling, schema normalization, complex SQL queries). • Maintained containerized SQL lab environments (PostgreSQL/MySQL) to ensure reliable access to preconfigured database instances. • Automated assignment grading using custom Python scripts (unittest, pytest), which reduced grading time by 30%. • Led tutorial groups for Python fundamentals (OOP, file I/O) as well as data manipulation using the Pandas library.
05/2021 – 07/2022	LG Electronics (Pune, India) Build & Release Engineer Technologies: Azure (VMs, AKS, Key Vault, App Gateway), Jenkins, Azure DevOps, Terraform, Ansible, Docker, Kubernetes, SonarQube, Snyk. • Development of secure end-to-end CI/CD structures using Azure DevOps Pipelines, Jenkins, and GitHub Actions to reduce release cycles by 60%. • Infrastructure-as-Code provisioning of Azure VMs, secure storage accounts, and AKS environments (Terraform & ARM). • Creation of Helm charts to support complex release models (canary rollouts, blue/green deployments) for mission-critical payment APIs. • Integration of SonarQube and Snyk (SCA) into active builds for early identification of static vulnerabilities. • Scripting of automated infrastructure provisioning (Linux/Windows Server) using Ansible playbooks and declarative Jenkins Groovy syntax.

EDUCATION

08/2022 – 05/2024	Southern Arkansas University, USA (Anabin H+) Master of Science (M.Sc.) in Computer and Information Science
08/2017 – 05/2021	Bharath University, India (Anabin H+) Bachelor of Science (B.Sc.) in Electronics and Communications Engineering

KNOWLEDGE AND INTERESTS

Programming	Python, Bash/Shell, PowerShell, Groovy, Java, JavaScript
SRE Concepts	SLIs/SLOs/SLAs, Error Budgets, Incident Management, Blameless Post-Mortems,
Cloud Platforms	AWS (EC2, S3, RDS, EKS, ECS, IAM, Lambda), Azure (VMs, AKS), GCP
Security	AWS IAM, Azure AD, HashiCorp Vault, SonarQube, Snyk
Container & CI/CD	Docker, Kubernetes, Helm, ArgoCD, Jenkins, GitHub Actions, Azure DevOps
Infra as Code	Terraform, AWS CloudFormation, Azure ARM Templates, Ansible
Monitoring & Log	Prometheus, Grafana, ELK Stack, Splunk, Dynatrace, CloudWatch
Certifications	AWS Certified Developer – Associate
Languages	English (Fluent) German (Beginner) Telugu (Native)
